

SOUND INNOVATIONS FOR HEARING IMPAIRED PEOPLE

TVL-3CW Wireless TV Loop Listener

The TVL-3CW will transmit audio direct to your hearing aid from your TV, music player or radio without any trailing leads or the need for an installed room loop.

Wireless receiver for use with loop or phones.

Personal induction loop, plugs into receiver phone socket directly or using short cable supplied.

Transmitter is placed close to the television and connects with the cables supplied to the TV SCART, phono or headphone socket
